Subject: RE: Public Hearing Notification - Lisa

Mary & Russ – Here is a short writeup in support of this bill:

I had the honor and privilege of supervising Lisa from 1997 through 2010. Lisa was an excellent engineer who understood the challenges and complexity of designing transportation infrastructure. Lisa was an exemplary employee with an excellent work ethic who inspired those she worked with and supervised. Lisa developed her project engineering skills over the years, and became very good at explaining complex problems and solutions to non-engineer parties, including other Department offices, towns, and the public.

Lisa's tragic passing was very painful to all of us and her loss was huge both in human and work terms.

I feel that naming the roadway in Lisa's honor is more than justified, given her contributions to the State's transportation network.

Robert Messina, CTDOT Facilities Design, Supervising Engineer, 860-594-3305, Robert.Messina@ct.gov
